

[Roham Kavousi]

{1402/01/31}

STEP (1)

First create an account by email

My email is [kavousi.ro@fe.lu.ac.ir]

STEP (2)

Open GIT BASH

Make repository by (mkdir) statement [named assignment]

Then execute (git init)

Make directory with name PART1 to order the repository

Make file by (touch) statement [named Part1.py]

STEP (2)

Copy source code in file Part1.py and then run it for debugging

STEP (3)

Import the source code from GITHUB with (git clone URL address) statement

Run the following code with Pycharm IDEL.
